- Please consult your local authorities if any permits are required to erect shed.
- Periodically check shed to assure that it remains stable and that the site remains level.
- It is highly recommended to secure the shed to an immovable object or to the ground by drilling holes in the floor at the pre-marked locations and inserting proper screws into the ground (screws are not included).
- Wear safety-goggles and always follow the manufacturer's instructions when using power tools.
- Wash shed with garden hose or a mild detergent solution. Using a stiff brush or abrasive cleaner could damage shed.
- Hot items such as recently used grills, blowtorches, etc. must not be stored in the shed.
- Heavy articles should not be leaned against the walls, as this may cause distortion.
- Keep roof clean of snow and leaves. Heavy amounts of snow on roof can damage the shed making it unsafe to enter.
- Although wind direction varies, it is an important factor when taking into account where to place your shed. Therefore, it is recommended to reduce wind exposure of the shed in general, and the door side in particular. Keep doors closed and locked to prevent wind damage.

- Portez des lunettes de protection et suivez toujours les instructions du fabricant lorsque vous utilisez des outils électriques.
- Lavez la Abri au tuyau d'arrosage ou avec un détergent doux. Utiliser une brosse dure ou un produit d'entretien abrasif risquerait de l'endommager.

- Ne pas déposer d'objets lourds contre les parois afin d'éviter tout risque de déformation.
